

Open access publishing

NWO aims for 100 percent Open Access. Therefore NWO requires that all publications emerging from research it funds must be made available in Open Access immediately upon publication. NWO accepts different routes to Open Access. By publications NWO means scholarly papers but also conference proceedings, monographs and book chapters. Different conditions apply to book publications.

Projects awarded from 2016 to 2020

Read the requirements for projects awarded before 2021 in the pdf below.

Open Access policy NWO 2016-2020

PDF | 408.15 KB

Projects awarded from 1 January 2021

NWO is updating its Open Access policy in accordance with Plan S. For projects awarded on the basis of calls for proposals published from 1 January 2021 onwards the requirements below apply.

Scholarly articles

All scholarly articles resulting from research that was wholly or partly funded by NWO must be made available in Open Access immediately (without embargo) at the time of publication, via one of the following routes:

Gold: publication in a fully Open Access journal registered in the Directory of Open Access Journals (DOAJ). (<https://www.doaj.org/>)

Hybrid: publication in a journal for which a transformative agreement exists or in a journal that has been accepted by cOalition S as a Transformative Journal. The VSNU has agreements with many of the major publishers that enable researchers to publish Open Access without costs. For an overview of these agreements see: www.openaccess.nl (<http://www.openaccess.nl>)

Green: Publication in a closed or hybrid subscription journal and immediate (without embargo) deposition of a copy of the publication (the Version of Record or at least the Author Accepted Manuscript) in an Open Access repository registered in the Directory of Open Access Repositories (OpenDOAR) (<https://v2.sherpa.ac.uk/opensoar/>). In the case of publications from life sciences, authors are strongly advised to use Europe PMC (<https://europepmc.org/>). Projects for which this possibility exists will be informed separately.

In all cases, a [Creative Commons CC BY licence](https://creativecommons.org/licenses/by/3.0/) (<https://creativecommons.org/licenses/by/3.0/>) must be applied to the article. In exceptional cases, a [CC BY-ND](https://creativecommons.org/licenses/by-nd/3.0/) (<https://creativecommons.org/licenses/by-nd/3.0/>) licence may also be chosen.

The cOAlition S [Journal Checker Tool](http://www.journalcheckertool.org) (<http://www.journalcheckertool.org>) can be used to check whether a publication venue is compliant with NWO's requirements and which of the above-mentioned Open Access options are available.
